

Name : Nikita Paresh Gavhale

I am a Web/UI Developer with 6+ years of experience in building responsive, user-friendly, and visually appealing web interfaces. I specialize in HTML5, CSS3, JavaScript, React, and CMS-based content development. Skilled in converting Figma designs into pixel-perfect web pages, managing website content within CMS tools, and improving UI consistency across platforms. Hands-on experience with JIRA, Git, TFS, Kanban, API integration, debugging, and cross-browser compatibility.

Work Experience

Senior Analyst- eClerx

Sep 2024 - March 2026

- Currently working on a CMS tool for managing, updating, and publishing website content.
- Translating Figma UI designs into responsive CMS components and web pages.
- Using JIRA for sprint tracking, task management, workflow visualization, and collaboration with cross-functional teams.
- Ensuring content accuracy, UI consistency, and pixel-perfect implementation inside the CMS environment.
- Coordinating with design and QA teams to deliver error-free, responsive, and visually consistent pages.

UI Developer - Ixia Solution LLP

Nov 2022 - Dec 2023

- Creating web pages that adapt seamlessly to various screen sizes and devices, ensuring an optimal user experience across desktops, tablets, and smartphones.
- Implementing responsive design principles using CSS media queries and flexible layouts to adjust content and styling dynamically based on viewport dimensions.
- Identifying and resolving bugs in web applications, whether they're related to layout inconsistencies, JavaScript errors, or compatibility issues across different browsers. I leverage browser developer tools and debugging techniques to diagnose and fix issues efficiently, ensuring smooth functionality and user satisfaction.
- Use version control systems such as TFS (Team Foundation Server), utilizing it to manage code repositories and facilitate collaboration within development teams. I adhere to established check-in procedures, ensuring that code changes are properly documented, reviewed, and integrated into the project repository. By leveraging TFS, I contribute to a streamlined development process, enabling efficient tracking of changes and facilitating team communication and coordination.
- Using Git and GitHub for version control and collaborative development workflows. I regularly create pull requests (PRs) on GitHub to propose and review code changes, following best practices such as atomic commits, descriptive commit messages, and meaningful PR descriptions. Through the PR review process, I actively engage with team members to solicit feedback, address concerns, and ensure code quality and consistency before merging changes into the main codebase.

Skills

Programming Languages

- HTML5
- CSS3
- JavaScript
- PHP,MySQL
- ReactJS
- CMS Tool
- JIRA
- Figma

Languages

- English
- Hindi
- Marathi

Hobbies

- Traveling
- Internet Surfing
- Reading Books
- Planting

Web Developer - Konverge Technologies Pvt Ltd

Sep 2021 - Oct 2022

- Working with open-source Human Resource Management Systems (HRMS), such as OpenCATS. I am proficient in installing, configuring, and customizing HRMS software to meet organizational requirements and business processes. I collaborate with HR stakeholders to identify system requirements, configure modules, and implement customizations to align with HR policies and workflows. Additionally, I provide ongoing support and maintenance for HRMS deployments, including troubleshooting issues, applying updates, and managing user access and permissions.
- Designing relational databases that efficiently store and manage structured data. I analyze business requirements and entity relationships to design database schemas that optimize data integrity, performance, and scalability. Whether designing new databases or optimizing existing ones, I adhere to best practices and industry standards to create robust and maintainable database solutions.
- Utilize draw.io, a versatile diagramming tool, to create visual representations of software architecture, workflows, and processes. I leverage its intuitive interface and extensive library of shapes and icons to design flowcharts, diagrams, and schematics that effectively communicate complex concepts and relationships. Whether mapping out system architecture, user workflows, or data flows, I use draw.io to create clear and concise diagrams that facilitate stakeholder communication and decision-making.

Production Supervisor - DSA ELECTRO CONTROLS PVT LTD(Non-IT)

Sep 2020 - Aug 2021

- Maintain Excel spreadsheets for tracking work-related data
- Monitor and manage stock details to ensure accurate inventory levels
- Supervise and assign tasks to a team of 15 employees on an hourly basis
- Maintain attendance records and ensure accurate timekeeping for all team members
- Develop timelines for product completion, specifying the quantity and timeline for each product
- Attend weekly meetings and provide comprehensive updates on project progress and team performance
- Perform quality analysis on finished products to ensure they meet required standards
- Coordinate with the sales and purchasing teams to ensure timely availability of raw materials

Web Developer - NP Infosec

Dec 2018 - Aug 2020

- Design, implement, test, and maintain software
- Design and develop web pages as per client requirements
- Research old projects, find the bugs/update software
- Making REST APIs required for Android Application development

Educational Background

B.Sc - Information Technology

University of Mumbai - CGPA 6.81
2015 - 2018

HSC

Maharashtra Board - 59.38%
February - 2015

SSC

Maharashtra Board - 72%
March - 2013
